

## **PHOENIX AUDIO TECHNOLOGIES PARTNERS WITH VOIP SERVICE PROVIDER, 2TALK**

IRVINE, Calif.—([BUSINESS WIRE](#)) —[Phoenix Audio Technologies](#), a world leader in the innovation of audio communication solutions, is pleased to announce that it has partnered with [2talk](#), a leading SIP Trunk and cloud PBX provider. 2talk will begin offering the Phoenix Audio SIP Conference Phone, [Spider MT505](#), as a hardware option along with its feature-rich services. 2talk has its own exclusive platform, which is SIP compliant and allows greater flexibility to develop and refine its services.

After evaluating a number of other conference phone options, the company has chosen Phoenix Audio's SIP Spider as a standout product and has been tested and certified for the 2talk platform. "The Phoenix Audio SIP conference phone surpassed our expectations! We tested this side by side with Polycom, Yealink, and Cisco phones and there is no comparison" says Wayne Toddun, 2talk CEO. "Excited to use more of these products!"

"Working closely with our partners to stay attuned to their clients' needs is imperative to our mutual success" says Jonathan Boaz, Phoenix Audio VP of Sales. "We look forward to supporting 2talk's valued client-base with our easy-to-use and high quality audio solutions that fit their evolving needs."

### **More on the Spider**

The Spider utilizes an extremely powerful DSP and state of the art proprietary algorithms, including noise suppression, echo canceling, de-reverb, and beamforming with direction-finding. Most notably, the SIP conference's dual connectivity, which supports bridging for audio and video calls, and unparalleled daisy chaining option to expand pickup range for any size room, is what sets itself apart in the market. A one-of-a-kind interactive touch button panel and a large display provides a smooth interface experience. Its voice tracking technique is enhanced through an under-the-grill set of LED that follow a person's direction of speaking and displays the algorithm in action. The Spider will come to life and display only the needed functions depending on the specific scenario to provide a no-hassle audio solution for any conference room. Given these innovative elements, there is no question that the Spider is a perfect solution for today's market needs.
