

PHOENIX AUDIO TECHNOLOGIES PARTNERS WITH BUSINESS PHONE SYSTEM PROVIDER, FLUENTSTREAM TECHNOLOGIES

IRVINE, Calif.—([BUSINESS WIRE](#)) —[Phoenix Audio Technologies](#), a world leader in the innovation of audio communication solutions, announced today that it has partnered with [FluentStream Technologies](#), a leading business phone system provider. FluentStream has added Phoenix Audio speakerphones to its list of supported IP conference phones, including the Phoenix Audio SIP Conference Phone, [Spider MT505](#).

FluentStream Technologies delivers all-in-one service, system, and support, while continuously developing new features and enhancements to better serve customers. “We are excited to be partnering with such an innovative company, such as FluentStream” says Jonathan Boaz, Phoenix Audio VP of Sales. “Phoenix Audio prides itself on designing easy-to-install, easy-to-use, high quality audio products, which will perfectly complement FluentStream’s solution. We look forward to providing the company’s growing client base with highly functional endpoints that fit their evolving needs.”

“Our innovative features cannot be optimally utilized without the proper hardware to support them. I think our customers will be happy to know we provide not only a fully-hosted business phone solution, but Phoenix Audio Technologies’ quality hardware that is both highly-configurable and easy-to-use.” says Joshua Elson, Founder & CTO of FluentStream Technologies.

More on the Spider

The Spider utilizes an extremely powerful DSP and state of the art proprietary algorithms, including noise suppression, echo canceling, de-reverb, and beamforming with direction-finding. Most notably, the SIP conference phone’s dual connectivity, which supports bridging for audio and video calls, and unparalleled daisy chaining option to expand pickup range for any size room, is what sets itself apart in the market. Its voice tracking technique is enhanced through an under-the-grill set of LED that follow a person’s direction of speaking and displays the algorithm in action. A one-of-a-kind interactive touch button panel and a large display provides a smooth interface experience. The Spider will come to life and display only the needed functions depending on the specific scenario to provide a no-hassle audio solution for any conference room. Given these innovative elements, there is no question that the Spider is a perfect solution for today’s market needs.

More on FluentCloud WebPhone

FluentStream Technologies’ customers can utilize a comprehensive set of business communication features, directly from the My FluentCloud Web Portal. The FluentCloud WebPhone can replace or augment business phone systems by offering the feature-rich utility of our fully-hosted VoIP service, right from a desktop. The OPUS audio codec seamlessly adapts to dynamic frame sizes, audio bandwidths, and bit rates, providing any user on the newest version of Google Chrome with HD Audio they can rely on. When used in conjunction with Phoenix Audio Technologies’ Duet Executive USB Desktop Portable Speakerphone, users can make conference calls right from their desktop without compromising sound quality. Both the My FluentCloud Web Portal and FluentCloud WebPhone are included in all business phone plans.
