Avery Dennison Upgrades their Conference Rooms with The Condor Microphone Array

Avery Dennison Corporation is a global materials science and manufacturing company specializing in the design and manufacture of a wide variety of labeling and functional materials. Today, the company employs approximately 30,000 employees in more than 50 countries.

The Task

Avery Dennison decided it was time to completely re-do the conference rooms in their office in Quakertown, PA. Their old rooms were too cluttered with wires and speakerphones on the table. Erik Szabo, a Technology Specialist at the company, was assigned the task to find devices to alleviate this pain while still making sure they were getting the best quality for their meetings.

Our Solution

Szabo found the Condor Microphone Array through the suggestion of an AV integrator and immediately knew this was the perfect product for the job. The Condor creates a clutter free meeting environment and gives the room a modern look. "It looks nice but more importantly, it works great. No phones in the middle of the table... and no wires running to that phone."

The Outcome

The entire office loves their new conferencing device. "You can stand in the far corner and talk very quietly, and the caller on the other end hears it clearly. We use it for calls, phone conferences, google meets, and more."
