

Partner Highlight- Audax Saves Time & Cuts Costs with Daisy-Chained Stingray DSP Mixers

The Problem

Audax was looking for a solution to integrate video conferencing into their client's large training room. The client is focused in the medical field and it was crucial that this training room would be a simple, user-friendly experience that was easy for anyone to come in use. When spec'ing out products for the install they looked at a variety of complicated and costly DSP's that would require a significant amount of time to configure, program, and would cost the client tens of thousands of dollars.

The Solution

Audax selected the **Stingray DSP Mixer** paired with the **Atlona Velocity** platform as the key solutions for this room. To accommodate the number of ceiling microphones, a podium microphone, and ceiling speakers in the room, two Stingrays were daisy-chained to connect the audio in the room. The Stingray paired with the intuitive Atlona platform and Dante integration allowed Audax to create a streamlined networked room that was just what the client need.

The Outcome

The integration of the Stingray and having a video conferencing enabled conference room alleviates the cost and time that these medical professionals would otherwise have to spend on these trainings. “The Stingray was a slam dunk. For us it was plug-and-play. You power it up, go on the front panel, adjust a few settings and you’re done. That’s it! My team loved it because we were in and out in less than an hour and a half”

-Sergio Magallon

Business Development at Audax

About Audax

Audax is a full-service technology systems integrator, dedicated to generating business value for your technology investments. Audax is determined to exceed customers expectations with the highest level of integrity in product performance and customer service. Their mission is to supply the best and most cost effective solution for their clients and perform services through a well-managed organization, focusing on quality.

About Phoenix Audio

Based in Southern California, Phoenix Audio Technologies is a leading innovator of audio communication solutions, striving to provide audio and video conferencing with simple-to-install, easy-to-use, high quality audio. The company designs and manufactures products that address the fast pace changes in communication trends, conferencing environments, and connectivity technologies. Phoenix Audio’s proprietary audio algorithms aim to improve the communication experience and enable people to speak freely and naturally with as little compromise in quality as possible.
